Tangent Engineering : Company overview

Established in the year 2010, Tangent Engineering in Mumbai started as Pharmaceutical machinery service providers & manufacturers. This well-known establishment now acts as a one-stop destination servicing customers locally and internationally. Over the course of its journey, this business has established a firm foothold in its industry. Company's core strength is the technical competency, know how & the service oriented approach towards the execution of projects that it undertakes. Years of experience & international exposure of the core members gives it an edge over the others. The belief that customer satisfaction is as important as their products and services, have helped this establishment garner a vast base of customers, which continues to grow by the day.

Tangent Engineering has expanded its line of products and services and caters to a larger client base in pharmaceuticals and as well other sectors such as Non-pharma water solutions, wastewater treatment solutions and serving other applications sectors such as Hospital, distillery, hatcheries, textile & dyes, and many more. It is known to provide top service in the following categories: Design, Manufacturing, Installation, and Commissioning and after sales services making it complete one stop solutions for users.
